PRECISION EYE DROPS | 10 mL

VizooVet®Protect Precision Dry iDrops

CMC-HA · Sodium carboxymethylcellulose (0.5%) and sodium hyaluronate (0.1%).

VizooVet®Protect Precision Dry iDrops is an ophthalmic lubricant used to relieve Dry Eye and its symptoms. In addition to **Propolis, Aloe Vera and Chamomile** extracts It now contains clinically proven ingredients such as 0.5% Sodium **Carboxymethylcellulose, (lubricating layer)** 0.9% **Glycerin** and 0.1% **Sodium Hyaluronate** to provide **dual action** lubrication and moisturization of the ocular surface.

Benefits of using VIZOOVET®:

Restores osmotic balance: It restores the tear film's natural osmotic balance by moisturizing the ocular surface and reducing the effects of tear evaporation.

- **Treats Dry Eyes:** It lubricates the eye surface and forms a protective layer that reduces friction, dryness, burning, and irritation.
- **Rapid and lasting relief:** VIZOOVET® quickly spreads across the eye surface to provide immediate lubrication and comfort. The formulation helps retain moisture on the ocular surface, supporting longer-lasting relief from dry-eye discomfort.

VIZOOVET® PROTECT works through a **dual-action** formula. **Sodium Carboxymethylcellulose** helps form a lubricating layer over the eye, while **Glycerin and Sodium Hyaluronate** help **retain moisture** on the ocular surface. Its formulation also supports the restoration of the natural **osmotic balance** of ocular surface cells, helping reduce dryness, burning, irritation, and discomfort.

Customer reviews · Earlier PROTECT drops with hyaluronate, standard 10 mL bottle

“My dog eyes look so much better after using these drops!” — April, July 17, 2025

“Vizoovet soothes the eyes, it works.” — Alyssia, April 30, 2025

Metered-dose bottles for preservative-free drops

The VISUVET® Precision Drop bottle delivers one measured drop with each full press. After each drop, incoming air passes through a filter to help protect the solution remaining in the bottle.

Petnetwork sells empty metered-dose bottles and makes custom ophthalmic formulations.

ioVetAC | ANTERIOR CHAMBER IOL

The IOL Solution when capsular support is compromised

ioVetAC

Anterior chamber intraocular lens

For selected veterinary cases with compromised capsular support, including zonular insufficiency or capsular rupture.

Retinal protection begins with the lens choice.

In IOVET-AC, the UV filter is embedded in the lens material, contributing to reproduction an important protective function of natural crystalline after its removal.

A differential designed for those looking for performance, technology and more care in every procedure.

MATERIAL / PRESENTATION
